I notice the job description appears to be truncated — it cuts off mid-sentence and doesn't give me enough detail about the specific private client work areas, required skills, or the firm's own language to mirror accurately. Could you share the full job description? Specifically, it would help to have:

- The full list of responsibilities and duties
- The person specification / required skills
- Any specific practice areas mentioned (e.g. wills, probate, LPAs, estate administration, trusts)
- The firm's name if disclosed
- Any language around values, client service standards, or team culture

With the full text I can mirror the employer's wording properly, tailor the cover letter to the actual role, and give you precise CV bullet suggestions rather than generic private client framing. If you paste the complete JD I'll produce the JSON output straight away.
